Hello Mike,

The correct size are Each piece .046" tall and .103 wide, and Mexico guitars have the same spec. Here are all the specs we offer

Modern Deep C "0.825" "0.920"

C/D "0.825" "0.890" --- No drawing available.

60's C "0.825" "0.975"

Thick Soft V "0.900" "0.990"

I'm sending you the CS guide so you can compare, the specs. Thank you for choosing Fender.

Eduardo:

=1 = MEDIUM JUMBO QUESTION

I have two emails from you showing Medium Jumbos are 0.046 x 0.103.

But the Fenders website shows Medium Jumbos as 0.036 x 0.106.

<https://www.fender.com/articles/gear/different-fret-sizes-explained>

Can you clarify what size are medium jumbos?

=2 = MEXICAN STRAT FRET QUESTION

I have searched and found a reference that the 2013 Mexican Strats frets are Medium Jumbos.

What is the fret size of 2013 Mexican Strats?

=3 = NECK SHAPES

I have found the Mod Shop Modern C cross section drawing in the Custom Shop catalog, page 38.

But, I cannot am not sure of the match with other neck shapes.

Can you tell me if I am correct in these matches between the Mod Shop and the Custom Shop?

Is the Mod Shop Deep C equal to the Custom Shop Large C?

Is the Mod Shop Thick C equal to the Custom Shop Oval C?

Is the Mod Shop Soft V equal to the '57 Style Soft V?

...

I cannot find the C to D neck shape. Do you have a cross section drawing?

Thanks for all of your help,

Mike LeBlanc
